

## A Special Journeys Bus Ride

The Special Journeys bus includes a professional bus driver. The bus driver greets you with a smiling face, loads and unloads luggage, manages the wheelchair lift, and makes sure we disembark right by the main doors of our destination.

The entrance door has steps with handrails that you can use to enter safely. Special Journeys also uses a custom step stool to make sure you can easily and safely get up to the top step.

Most buses seat up to 56 people, depending on how many people have wheelchairs. In addition to the large bays underneath for luggage, it has overhead compartments to hold your carry-ons.

The bus has a center aisle with 2 seats on either side and a large picture window next to every outside seat so that you can enjoy the scenery. It has a restroom in the back. It contains 5 or 6 TV screens around the bus for movies and has speakers above each seat. Each seat has its own seatbelt.

The first 3 rows in the front are reserved for the Tour Leaders and individuals who need extra mobility assistance. For the rest of the bus, there is no assigned seating, and our Travel Companions and other travelers will be mixed together throughout the seats.

The bus has a house sized heating and cooling system, so pack a sweater if you get cold easily. You can bring snacks on the bus in your carry-on. Special journeys will have water available for anyone who wants it.
